

The background of the entire page is a vibrant red. In the center, there is a glowing, circuit-like padlock icon. A hand is visible at the bottom, with a finger pointing upwards towards the padlock. The overall aesthetic is high-tech and digital. The text 'SIMPLIFY IDENTITY SECURITY' is prominently displayed in the lower half of the image.

SIMPLIFY

IDENTITY SECURITY

WHY IDM TECHNOLOGIES?

- A pure-play and end-to-end Identity & Access Management (IAM) solutions and service provider.
- Expertise in multiple industry-leading technology partners providing Advisory Services & Assessment, Professional Services, and Managed Services.
- Managing over 4 million identities.
- Core team with a combined 100+ years in Identity & Cybersecurity with global experience within BFSI, Public Sector, Telco.
- Ensuring 99.99% uptime SLA.
- Hand-picked talent with a good pool of SMEs for quicker mobilization.
- Know-how of over 50 complex enterprise use cases, for quicker deployment and integration (including customization), bridging the gap between OOTB and lack of OEM support.
- Well-established internal Center of Excellence (COE) capable of demonstrating and running Proof of Concepts (PoC).
- Highest Quality of Professional Services for complex customizations at competitive price.

We Simplify Identity Security

VISION:

To be the world's top Identity Security service provider and thought leader; protect individuals, organizations, and society through improved security and reduced risk; ensuring identity solutions are accessible and affordable to everyone.

MISSION:

Fulfilling and surpassing clients' expectations; uncompromised expertise and quality of services combining best-in-class Identity Security solutions; following industry best practices & methodologies; with 100% client retention.

OUR SOLUTIONS

We deliver IAM & PAM services using industry-leading technology stacks, processes, operating models, and maturity levels across multiple geographical locations.

- Identity Governance & Administration (IGA)
- Single Sign-On (SSO)
- Privileged Access Management (PAM)
- Customer Identity & Access Management (CIAM)
- Digital Identity and Zero-Trust
- Multifactor Authentication (MFA)

OUR SERVICES

From advising to managing, IDM will carry out all your Identity Security-related services from start to finish; and proficiently.

- Advisory Services & Assessment
- Professional Services
- Managed Services

ADVISORY SERVICES & ASSESSMENT

IDM Technologies takes a business-first approach to Identity & Access Management (IAM) advisory services.

Current State Assessment

.....

Review current IAM Processes, Policies, People, and Tools.

Gap Analysis

.....

Reveals PPT gaps (People, Processes, and Technology)

Summary of Findings

.....

Perform study for application Integration feasibility with IAM.

IAM Strategy and Roadmap

.....

Robust plan and roadmap to fixing the gaps & application integration.

PROFESSIONAL SERVICES

IDM experts help organizations in improving the process, people & performance aspects of the system.

CUSTOMIZATION

IDM experts help organizations improve the system's process, people, and performance aspects.

DESIGN & IMPLEMENTATION

Our team will design and implement Identity Security solutions based on your needs, and priorities with uncompromising expertise.

MIGRATION & UPGRADE

Moving from one IAM solution to another or upgrading an existing IAM system to a newer version. These services will ensure a smooth transition while preserving data, security configurations, and user access.

MANAGED SERVICES

Provides reliable, cost-effective support for your business platform applications (IAM & PAM Platform, Database & Directory Services- LDAP) and their infrastructure. Consistent access and support and no need of additional internal team.

Support Operation Centre

- Onsite or Remote: 24x7, 8x7, or 8x5 based on business needs
- Meet severity-based SLA's IAM & PAM Platform Support.
- Database & Directory Services-LDAP support.
- Support on Change Management & Infrastructure

Change Management

- Establish change request process
- Impact assessment
- Rollback plan
- Change documentation
- Change approval
- Change implementation

Application Integration Support

- New application integration onboarding.
- Enhancement of existing application integration.
- Customization on access review & integration report.

Governance & Monitoring

- Reporting & Analytics to monitor.
- Live access review dashboard.
- Incident logging and reporting.
- Management of incidents from identification to resolution.

IAM USE CASES:

01

Identity Governance & Administration (IGA)

- › Identity Governance
- › Role Based Access Control
- › Identity Self-Service Portal
- › Identity Risk
- › Certification & Attestation
- › Segregation of Duties
- › Audit and Compliance

02

Single Sign On and MFA

- › Federation (OAuth 2.0 and SAML)
- › MFA
- › Push notification
- › One-time password (OTP) via app, email, or SMS
- › FIDO2 security keys
- › Biometrics (facial, fingerprint, and more)
- › OATH: For use with OATH-based hardware devices (Yubikey, RSA)
- › Risk-based authentication (location, device and environmental factors)
- › X.509 certificates

03

Customer Identity & Access Management (CIAM)

- › Seamless & Simplified Self-Service
- › Single Sign-On (SSO)
- › Unified & enhanced customer experience
- › Manage user consent and preferences
- › Highly scalable deployment to support large userbase

04

Privileged Access Management (PAM)

- › Privileged Access Control
- › Password Management
- › Session Monitoring and Control
- › Just in Time Access
- › Live recording, event management and notifications

05

Digital Identity and Zero Trust

- › Federated Login using third-party identity provider (Government or other Verified Identity Provider)
- › Passwordless Authentication
- › Adaptive Risk Management & Multifactor Authentication (MFA)
- › Remote and Mobile Workforce
- › BYOD (Bring Your Own Device)
- › Third-Party Partners and Contractors
- › Credential Theft Prevention
